Heidar Javadi

Android Developer

📞 +98-901-121-2178   @ Fh.javadi@gmail.com   🔗 HeidarJavadi.ir   📍 Mashhad,Iran

SUMMARY

Experienced Android developer with over five years of programming expertise and two years of teaching experience in Android development. Passionate about delivering high-quality and efficient solutions using advanced technologies and artificial intelligence. Prioritizes customer satisfaction, product quality, and clean code in all projects. Extensive experience in Android application development across healthcare, management, e-commerce, and multimedia. Skilled in developing applications for wearable devices and integrating electronic boards with Android systems.

EXPERIENCE

Android Developer

Masis web   03/2019 - 03/2021   Mashhad, Iran

· During my tenure, I have successfully conceptualized, designed, and implemented over six practical projects utilizing advanced programming techniques. Through these endeavors, I have significantly expanded my proficiency in leveraging diverse APIs and Android programming architectures. Notably, I have gained substantial expertise in developing Android applications across a wide spectrum of domains, including healthcare, management, and e-commerce. My technical prowess encompasses Java, Kotlin, and PHP, enabling me to construct robust and user-centric applications. Furthermore, by seamlessly integrating with APIs and incorporating third-party libraries, I have consistently devised innovative solutions to intricate technical challenges.

Android Developer and Back-end Developer

Sharif University management consulting   03/2021 - 06/2022
Tehran, Iran

· In this role, I have acquired substantial expertise in Android programming, complemented by my proficiency in PHP backend support. Furthermore, I have honed my abilities to thrive in detail-oriented teams and university settings, fostering successful collaborations in these environments.

Android Developer

Startup in collaboration with Jihad Academic University
08/2022 - 12/2022   Mashhad, Iran

· During my tenure at the Bio Health startup, I collaborated with Jihad University to develop Android applications that seamlessly interfaced with electronic boards, enabling real-time communication. Additionally, I successfully managed and mentored junior programmers, providing them with valuable support. This experience allowed me to acquire practical expertise in integrating Android applications with hardware technologies.

Android Developer

Shahr sa'at Javaherian   03/2023 - 06/2024   Mashhad, Iran

· During my tenure at Shahr sa'at Javaherian, I significantly enhanced my proficiency in developing applications for wearable gadgets. Furthermore, I consistently implemented cutting-edge concepts such as threading and Room, and I possess proven expertise in integrating with applications tailored for health monitoring enthusiasts.

SKILLS

Java • **Kotlin** • **PHP** • **Photoshop** • **Git** • **MVVM** •
SDK • **REST** • **SQLite** • **Firebase**

CERTIFICATION

Android programming with Java
IranTVTO course focusing on the latest Android and Java development practices.

Android programming teaching with java
By IranTVTO.

EDUCATION

bachelor's in Computer Engineering
Imam Reza University
09/2019 - 05/2024   Mashhad, Iran
